Job Description

Introduction

ARM is looking for a range of talented and enthusiastic students to spend their industrial placement year in our IT department

Developer IT Placement

ARM is looking for a range of talented and enthusiastic students to spend their industrial placement year in our IT department. Successful candidates will be assigned projects where they will have to capture requirements, fix problems, add new functionality, plan future improvements and document changes.

The developer industrial placement role within ARM IT is for candidates who wish to enhance their current skills in either software development or web development

We are interested in someone with enthusiasm, someone who can work with the talented IT team to create industry leading solutions to complex problems.

Within ARM, the IT group maintains and supports a wide range of services, applications and platforms to assist the business to achieve its corporate goals. Supporting such a diverse global business with demanding computing needs provides IT with an interesting and challenging work environment. IT has a great opportunity to investigate all of the various technologies and devices that are built around ARM's IP with the goal to implement them in the corporate environment.

Job Requirements

Are you a good fit for ARM?

The successful candidate should be able to demonstrate strong technical skills and will be in the 2nd year or later of an IT related degree or a recent graduate. The successful candidate should also have specific skills related to software or web development.

They will be self-motivated and able to work effectively on their own and as part of a team.

It is also important that the candidate has a passion for technology. They should be enthusiastic and keen to learn and further their skills.

Essential skills and experience that we are looking for include experience of at least one of:

Essential skills and experience that we are looking for include experience of at least one of:

- C/C++/Java/Python coding OR
- Web Development Technologies eg. PHP, Perl, Javascript AND
- Relational Database Fundamentals e.g. SQL, Indexes, Optimisation

Previous work experience within an IT or engineering environment would be an advantage, including experience in some of the following areas:

- Computer Infrastructure
- OS Fundamentals
- Linux & Unix Administration
- Windows Administration
- Troubleshooting Skills
- Programming Skills
- Software Development Methodologies
- Database Administration
- Networking Fundamentals
- Security Fundamentals
- Project Management Fundamentals

What's in it For You?

As an intern at ARM, you will work on real projects that have real impact, while also building on key skills for your future studies and employment. We believe in developing talent for the future, and therefore aim to offer many of our interns a graduate position once they have finished their studies.

Working on interesting new projects is exciting but we also know how important it is to receive support. That's why you will have regular 1 to 1 meetings with your line manager who will be able to offer ongoing support, feedback and development opportunities. You will be given a certain amount of flexibility and freedom in how you decide to complete your project tasks.

As well as being offered a competitive salary, there are also opportunities to get involved in some of the many social events that are organised within ARM.

About ARM

ARM® is at the heart of the world's most advanced digital products. Our technology enables the creation of new markets and transformation of industries and society. We design scalable, energy efficient-processors and related technologies to deliver the intelligence in applications ranging from sensors to servers, including smartphones, tablets, enterprise infrastructure and the Internet of Things.

Our innovative technology is licensed by ARM Partners who have shipped more than 50 billion Systems on Chip (SoCs) containing our intellectual property since the company began in 1990. Together with our Connected Community, we are breaking down barriers to innovation for developers, designers and engineers, ensuring a fast, reliable route to market for leading electronics companies.

With offices around the world, ARM is a diverse community of dedicated, innovative and highly talented professionals. By enabling an inclusive, meritocratic and open workplace where all our people can grow and succeed, we encourage our people to share their unique contributions to ARM's success in the global marketplace
